

Battery Charger System for airplane gangways in Dubai

Industrial Automation

SCHAEFER supplied the Dubai International airport with customized battery charger systems for Airplane gangways or so called jet bridges which are enclosed, movable connectors which extend from an airport terminal gate to an airplane, allowing passengers to board and disembark without going outside. Depending on building design, sill heights, fueling positions and operational requirements, they may be fixed or movable, swinging radially or extending in length.

- Thyristor-controlled 24V/ 80A battery charger system
- Constant current and voltage operation
- Industrial grade components
- Continuous short circuit protection
- High level of humidity protection
- Concise & clear operation panel on front door of the cabinet
- Turn key solution
