

REACH Declaration

REACH is the European Community Regulation on chemicals and their safe use (EC 1907/2006). It deals with the Registration, Evaluation, Authorization and Restriction of Chemical substances. Concerning article 33 of REACH we will inform you of the following:

The company Schaefer Elektronik GmbH is manufacture of power supplies, thus in the sense of REACH we are called "downstream user". The products we supply to you are solely non-chemical products (goods). Moreover and under normal and reasonably foreseeable circumstances of application, the goods supplied to you shall not release any substance. For that, the company Schaefer Elektronik GmbH is neither obligatory for registration nor for creation of material safety data sheet (MSDS).

However, we are subject to Art. 33 REACH. This states, that any supplier of articles containing more than 0.1% of substance of very high concern (SHVC) is subject to the obligation to notify customers. The substances that are subject to the notification can be found on the ECHA candidate list.

According to our current knowledge, some products could contain lead up to 4% (CAS number 7439-92-1). Here, the lead is firmly integrated as an alloy component. An isolated transfer to the human body or the environment is not to be expected under normal conditions of use. At the request of customers, we can issue product specific REACH declarations.

Independent of that fact, we are intensively pursuing the realisation of REACH on the part of our suppliers. We do that in our own interest and in order to guarantee a high level of product safety for our customers. We are in close contact with our suppliers of chemistry and prepared material and will implement the pre-registration and / or later registration of the relevant materials in REACH respectively in our process of supplier qualification.

All information in this declaration is given to the best of our present knowledge and belief. We rely on the REACH conformance declaration of our suppliers and do not assume liability for accuracy of their statement.
